

# TR4ST The Rules for Sport Talents

Dear Team Leaders,

here we are a month after the Edu-Lab of Budapest and ready to go to Ankara!

I think that now is the right moment to make the first report of our project, in order to organize also the first ideas for our Ethic Paper.

Before the coordination meeting in Turkey I would like to invite you to share through email a report that collects your, and your team's, considerations about the experience in Budapest. Attached you find a document with questions collected during the Lab that you and your team will have to answer (following and participating in the discussions also on the web sharing your materials). Please consider that you and your team can participate both with a written text and with videos, interviews, recordings, photos, pictures, drawings...As many people you involve the better it is.

As from the document "*WORK in KofM\_01.pdf*" you find attached that was issued soon after the Kick off meeting of TR4ST in Cremona last 14-15-16 June 2013, every partner and the applicant have different topics and tasks discussed during the meeting and belonging on your Organizations peculiarities on which I hope you will continue to focus on in your activities in the following of the project. This document collects the results of the first discussion between the partners on the project so please compare it with the results and consideration that will be brought up.

Please consider that there is no limit of participation and participants in this project and each of you as a single or organization can invite citizens, institution, schools, organizations... to support this project as it is in their possibilities (through facebook page or blog, writing letters and making/sending pictures/video/movies, sharing information, being personally involved in your local events...) involving them in these and other discussions about topics you want to deepen. Please remember to always share your activities and ideas between us, also through email sometimes, to keep us updated.

During Edu-Lab Polgar Foundation started forming the Technical Scientific Committee (TSC) through inviting a couple of representatives of Summelweis University and so we hope all the partners are working to find their own members to be involved in the TSC (as well as Testimonials), and that you will present them to all of us and involve them, as written in the project.

I know Altropallone ASD Onlus is already working for organizing next Edu-Lab that will take place both in Milan and Cremona in 2014 early summer. So I invite you all to start organizing the selection of the candidates sharing your good practices, doubts and suggestions considering your first experience.

In Ankara we will for sure have time to discuss together about all these topics and about the future steps of the project, of course according to the programme of the meeting that Ali is probably preparing and that will be shared with us as soon as it will be ready.

In this occasion you will have also to:

- 
- start deliver to the representatives of the Municipality the first administrative/financial documents (original invoices, receipts..) you already have;
  - presenting the excel “2012\_4\_6\_eacea\_invoice\_LOGO.xls” attached (with project logo);
  - presenting the “2012-4 6-final-report-form.doc” filled according to the information available.

**All the documents mentioned are also on Google Drive in the folder named “YiA4.6” shared between all the project group leaders.**

Please use Google Drive to find, to share and to archive docs of the project you use or you create new for your project activities.

I thank you all for your attention,

Please remember to send the report by e-mail to [TR4ST@googlegroups.com](mailto:TR4ST@googlegroups.com) specifying as object “Budapest EDULAB report” , not later than 10<sup>th</sup> January 2014.

Thank you very much for your cooperation.

See you soon,

Good work!

Tania Secchi  
Municipality of Cremona
